PROJECTS

Portfolio Website— [\[Live Preview\]](#)

Designed and developed a personal portfolio site.

- Built with HTML, CSS, and JavaScript
- Showcases projects and contact information

[EBookStore\(ASP.NET Core\)](#)

- Developed a full-stack online bookstore enabling users to browse and purchase books.
- Built an admin dashboard allowing CRUD (Create, Read, Update, Delete) operations for managing books.
- Gained practical experience with ASP.NET MVC architecture, routing, and model binding.

[NewsApp\(React.js\)](#) — [\[Live Preview\]](#)

- Designed and developed a dynamic news application that fetches real-time articles from an API.
- Implemented a smooth and responsive UI for an enhanced user experience.
- Supports multiple news categories to keep users updated.

[Password Generator\(React.js\)](#) — [\[Live Preview\]](#)

- Users can generate strong passwords based on selected criteria (length, numbers, special characters).
- Used the clipboard API to allow users to copy the generated password with one click.
- Styled with responsive design using Tailwind.

[StudyBuddy\(Django Framework\)](#)

- Developed a **Q&A-style web application** where users can post questions, write answers, and engage in topic-based discussions.
- Implemented user authentication, post creation, search functionality, and comment/reply features to foster interaction and knowledge sharing.

[E-Commerce\(React.js\)](#) — [\[Live Preview\]](#)

- Developed an e-commerce website for clothing brand using MERN stack.
- Created cart functionality, added payment gateway, and many more functionalities.
